Kershaw Knives

1974-2006

Offset
Model 1597
"2005 Overall Knife
of the Year"

Since 1974 we've been building the highest quality knives available. Our goal from the beginning was to build a "Tough as Nails" product and stand behind it.

Well, 32 years later and we're leading the industry in new product design and innovation, and we still offer our famous Limited Lifetime Guarantee.

kershaw®

KNIVES

1974

Kershaw opens for business with its no-handle, lifetime guarantee.

1978

Kai Cutlery Co., Ltd. of Japan purchases Kershaw Knives and creates Kai USA Ltd.

1982

Kershaw expands line of field knives. Folding Pocket Knives, and adds its Floating Fish Filet knives.

1986

Kershaw expands its market into Europe as Kai Cutlery Europe.

In memory of Bailey Made Offices (1960-1984), the D.W.D. model 2000 was added to the Officer Ranch Series.

1990

New series added to the Kershaw product line: American Hand-Crafted Stag, Saber, Tooth Holders, Manago work knives, and a new line of dress knives and accessories.

1994

Kershaw's limited-edition Scrimshaw originals by renowned artist Walter Alexander, expands to include hunting dogs, African wildlife, waterfowl and North American wildlife.

1995 Two new series added to Kershaw's product line: Liner Lock models and the unique Lever Action series.

1996 Standard Blade Trainer model KPMAC, with patented cut-throat skimming blade added to line.

1997 Kershaw introduces the Multi-Tool, Juggo ATAC, and obtains patents on its unique adjustable locking pins.

Ken Onion

A Master of his trade, Ken Onion, is one of the most-sought-after custom knife-makers in the industry. His custom knives can be found in the most prestigious private knife collections as well as in the pockets of his world-wide following.

When Ken was 5 years old he received his first knife. It was a cheap brand that his dad brought home from work and, after grinding off the point to make it as dull as possible, he gave it to Ken. Of course, this wasn't going to work and after countless hours of hard work on the sidewalk Ken managed to restore the point and cutting edge, only to have his dad confiscate it, scold him, and make it dull again.

Ken's early years were spent in Wellington, Ohio and Rochester, New York. When he was 12 his family moved to Palestine, West Virginia to a 213-acre farm where a teenaged Ken Onion was inspired by Vernon Ott, blacksmith and maker of garden tools and knives. In 1981, Ken graduated from high school, joined the United States Marine Corps and became a F4 Phantom mechanic for VMFA 212 out of Kaneohe Marine Corps Air Station. This move marked the beginning of Ken's quest to design the perfect knife. While stationed in Hawaii, Ken worked part time for Advance Aviation, restoring vintage aircraft. Since leaving the Corps in 1985 Ken has worked in various fields including construction, heavy equipment repair, and hydraulics repair.

In 1987 Ken moved to Anderson, South Carolina where he worked with robotics and automation for the Robert Bosch Corporation. After two years, Ken was hired by BHP Petroleum, in Hawaii and worked as a machinist and inspector. While shopping with his wife, Ken saw his first knife magazine, and after reading it from cover to cover, realized he wasn't the only enthusiast with a passion for knives. He subscribed to every knife magazine and annual available and became consumed by the knife craft. In November 1991, Ken met Stan Fujisaka, a very talented knife-maker who agreed to teach Ken the art of knife making.

After years of preparation—and some inspiration while working on a Harley cam for a friend—Ken created his first SpeedSafe® knife. Today, Ken designs a custom selection of knives for Kershaw, many featuring the patented SpeedSafe torsion bar system for assisted opening. His personal involvement throughout the design and manufacturing process ensures each knife meets his high standards for performance and quality.

Professional Bull Rider Guilherme (Hollywood) Marchi

Sponsored by
Kershaw Knives

2005 PBR
World Finals
Average
Champion

Marchi

Kershaw is proud to sponsor one of the world's toughest bull riders, Guilherme Marchi. Known as "Hollywood" for his star status, Guilherme is 2005's PBR World Finals Average Champion—as well as a PBR event champion in Montana, Missouri, and South Carolina. Guilherme finished the 2005 season ranked second in the world and has the highest riding percentage—66.3%—among the world's top 45 PBR bull riders.

As strong as Guilherme's 2005 season was, bull riding fans everywhere are looking for even more out of this Brazilian bull rider in 2006.

Guilherme's skill and toughness make him the right match for Kershaw's own tough and skillfully made line of products.

2002

2006

1999: Kershaw's 25th anniversary BlackOut. Model 1594 wins Blade Magazine's Blade Show "Best Buy of the Year" award.

2000: Kershaw's Duo model 1580 wins 19th "International Knife Award".

2001: Black Out, model 10000, wins Blade Magazine's Blade Show "American Made Knife of the Year" award.

Kershaw introduces Ken Onion's Lock with SpeedSafe, model 14020M, the first knife with a rainbow finish, wins Blade Magazine's Blade Show "Overall Knife of the Year" award.

2002: Ken Onion's Lock with SpeedSafe, model 14020M, wins Blade Magazine's Blade Show "Overall Knife of the Year" award.

2003: Ken Onion's Lock with SpeedSafe, model 14020M, wins Blade Magazine's Blade Show "Overall Knife of the Year" award.

2004: National Geographic, Caribbean Trail, model 150M with it's patented features wins Blade Magazine's Blade Show "Most Innovative Import of the Year" award.

2005: Kershaw wins Blade Magazine's Blade Show with an unprecedented 4 awards—E.L. model 1590, "Most Innovative American Made Knife of the Year" (MISAT), model 1597 "Overall Knife of the Year", Ken Onion's Lock, model 14020M, "Kitchen Knife of the Year" & the Spyderco Spyder, model C14 "Knife Collaboration of the Year".

Kal USA Ltd. and Kershaw Knives, in proud partnership with the Farnsworth Institute of America, introduce 77 Zero Tolerance knives, a new series of combat-ready knives for military and law enforcement use.

Blade Magazine's Overall Knife of the Year

OFFSET

Model 1597

Steel.....Metal injection molded (MIM) 440C stainless-steel with Tungsten DLC coating

Handle...6061-T6 multi-colored anodized aluminum 3-D machined

Blade.....3 3/4 in. (9.5 cm)

Closed...5 1/4 in. (13.3 cm)

Weight...8.5 oz.

The latest technology

gives birth to the newest style in the new Offset from Kershaw. The Offset's rugged and complex blade geometry is provided

through state-of-the-art Metal Injection Molding (MIM) and hot isostatic pressing. It's a technique we call MITE—Metal Injection Technology with an Edge™. The result is a precision blade with two bevel geometries, hollow and flat, for incredible cutting power. Here's how MITE works:

A blade mold is created and filled with a combination of powdered metal and binder. When it comes out of the mold, the blade is 20% larger than its

finished size. The next stage of the process, sintering, removes the binder. Once it is sintered, the blade has reached its finished size and is at a density of 94%. Finally, the blade is HIPed under extreme pressure, approximately 32,000 psi, to increase the metal density to 99.7%.

In the Offset, this process produces a premium 440C-PM stainless-steel blade with complex, true 3-D geometry. But that's just the beginning. The Offset also features the latest SpeedSafe configuration. It's our new "Double Pumper" design and it features two torsion bars to ensure easy assisted opening for folding knives with larger blades—such as the Offset. It also offers a unique, splattered-paint handle in anodized 3-D machined aluminum.

What is SpeedSafe?

SpeedSafe® is the patented, assisted-opening system built into many of Kershaw's best-selling Ken Onion knives. SpeedSafe assists the user to smoothly open the knife with a manual push on the blade's thumb stud or Index-Open system. (Index-Open uses a protruding portion of the blade's finger guard to give the user an alternative to the thumb stud. The user manually pulls back on the protrusion with the index finger to open the blade.)

How does SpeedSafe work?

The heart of the SpeedSafe system is its torsion bar. Closed, the torsion bar helps keep the knife closed, preventing it from being opened by "gravity." In order to open the knife, the user must apply manual pressure to the thumb stud to overcome the resistance of the torsion bar. After the blade is out of the handle, the torsion bar moves along its half-moon track and takes over. The blade opens smoothly and locks into position, ready for use.

Is a SpeedSafe knife a switchblade?

NO! There are many unique features of SpeedSafe knives that make them quite different than knives that are considered switchblades. Unlike a switchblade, SpeedSafe blades **DO NOT** deploy with the push of a button in the handle or by gravity alone. Instead, the user must manually overcome the torsion bar's resistance—using the thumb stud or Index-Open protrusion on the blade itself—in order to engage the SpeedSafe system. Because the user must manually overcome the torsion bar's resistance, SpeedSafe knives fall fully outside the Federal definition of a switchblade. However, due to the complexity and constantly changing nature of these laws and regulations, it is impossible for Kershaw Knives to be aware of every restriction in every location in which our knives are sold or carried. It is the responsibility of the buyer to investigate and comply with the laws and regulations that apply in his or her specific area. At Kershaw, we are proud to be able to offer this convenient, secure technology.

Who are our SpeedSafe customers?

SpeedSafe was specifically designed for sporting and work situations where one-handed opening is preferable and safer. Its safe, efficient opening has made it a popular choice for hunters, fishermen, and those who require the one-hand opening function on the job-site.

How Safe is SpeedSafe?

Very. SpeedSafe technology is designed to be safe and secure. The blade opens **ONLY** when the user manually deploys it using either the thumb stud or Index-Open protrusion. Once deployed, a locking system secures the blade in position so that it cannot close accidentally. When releasing the lock, the blade does not snap shut due to resentence provided by the torsion bar. This bar also provides a bias towards the closed position (which holds the blade securely closed). New SpeedSafe users can ensure safe use of the technology by practicing to proficiency.

SPEEDSAFE®
TECHNOLOGY WITH AN EDGE

Kershaw SpeedSafe knives are covered by one or more pending and issued U.S. patents, including: 5,802,722; 5,815,927; 6,145,202; 6,338,431; 6,378,214; 6,397,476; 6,427,334; 6,591,504; D438,085; D450,228; D454,043; D454,768; D455,062; D474,669; & D488,045.

**Precision,
Performance,
& Impressive
Styling**

It's called the E.T. But not for its out-of-this-world looks. E.T. stands for External Toggle.

The External Toggle is Kershaw newest technology for deploying and securing a blade. And it offers a number of unique benefits—like extreme security.

Fold the blade in, engage the safety, and the blade is secure no matter how or where you carry it.

2002

Introduces the Kershaw SpeedSafe lock, model 1500 wins Blade Magazine's Blade Show "Best Buy of the Year" award.

1999 Kershaw's 25th anniversary Blackout, model 15500 wins Blade Magazine's Blade Show "Best Buy of the Year" award.

2001 Kershaw's Best model 1500 wins 19th "International Knife Award".

2001 Black Out, model 15000A wins Blade Magazine's Blade Show "American Made Knife of the Year" award.

Kershaw introduces Ken Onion's Lock with SpeedSafe, model 15000. The first knife with a rainbow finish, wins Blade Magazine's Blade Show "Overall Knife of the Year" award.

2002 Ken USA Ltd.'s Sharp Tactical B* Santoku, model DM370, wins Blade Magazine's Blade Show "Kitchen Knife of the Year" award.

2004 National Geographic Channel took model 1004 with its patented features wins Blade Magazine's Blade Show "Most Innovative Impact of the Year" award.

2005 Kershaw sweeps Blade Magazine's Blade Show with an unprecedented 4 awards: E.T., model 1980, "Most Innovative American Made Knife of the Year," DM360, model 1500 "Overall Knife of the Year," Ken Onion B* Chef's, model DM3560 "Kitchen Knife of the Year," & the Spyderco Spyder, model C96 "Knife Collaboration of the Year."

2006

Ken USA Ltd. and Kershaw Knives, in proud partnership with the Paratrooper Veterans of America, introduce 21 (Twenty One) Knives, a new series of combat-ready knives for military and law enforcement use.

RIPCORD

Model 3200

Steel.....Sandvik 13C26 stainless-steel

with Tungsten DLC coating

Handle.....6061-T6 anodized aluminum

with Trac-Tec inserts

Blade.....3 7/16 in. (8.6 cm)

Closed...4 3/8 in. (11.1 cm)

Weight...4.2 oz.

Includes belt clip

with deployment

knob

To Deploy the Blade:

1. Grasp the handle.
2. Rotate the handle 80-100 degrees until the handle is horizontal.
3. Slide the handle to the rear.
4. Remove from knob on clip.

Blade is now deployed, locked and ready for use.

To Retract the Blade:

1. Hold the knife horizontally with the slot towards the clip's protruding knob.

Belt Clip
with Knob

2. Locate the large opening at the end of the slot on the handle. Firmly press the knife against the knob at this location (the knob will enter the opening and cause the lock function to disengage).
3. Slide the handle forward until a positive stop is noticed (this action will cause the blade to retract into the handle).
4. Rotate the handle downward to a vertical position, or simply let go of the handle.

Blade is now safely stored in the handle.

Another unique entry is the Ripcord. The Ripcord's patented design lets you store it in the space of a folding knife, yet it provides the strength and stability of a fixed blade knife. With Kershaw's "Out the Front" (OTF) design

the blade slides out the front of the handle into a secure, fixed-blade position. To store it, just reverse the process.

Closed...3 1/2 in. (8.4 cm)
Weight...2.3 oz.

SCALLIONS
Ambidextrous Opening

**Scallions
with Bite**

Kershaw's Ken Onion Scallions are designed to meet the needs of the knife user who wants SpeedSafe technology in a smaller carrying knife. Naturally, all Scallions feature SpeedSafe ambidextrous assisted opening, plus our secure locking liner.

They also feature an enormous range of handle designs. Choose from basic black polyamide, colorful anodized-aluminum, or our 3-D photographic images. The colors are created in the anodizing process, hardening the aluminum and

producing a porous, oxide coating that can absorb dyes. The images are applied in a unique new photographic process that permanently transfers the image to the handles. The colors and images are not only great looking, but durable and scratch-resistant, too.

2002
 1999 Kershaw's 25th anniversary. Blackout, model 5500, wins Blade Magazine's Blade Show "Best Buy of the Year" award.
 2000 Kershaw's first model 5500 wins IWA "International Knife Award".
 2001 Black Out, model 1600BL, wins Blade Magazine's Blade Show "American Made Knife of the Year" award.
 Kershaw introduces Ken Onion's Link with SpeedSafe, model 1600BL, the first knife with a removable tip lock. Wins Blade Magazine's Blade Show "Overall Knife of the Year" award.
 2002 Ken USA 100's Show "Best of Show" award. Kershaw, model 1600BL, wins Blade Magazine's Blade Show "Overall Knife of the Year" award.
 2004 National Geographic Channel. Ken, model 1600BL, wins it's patented features with Blade Magazine's Blade Show "Most Innovative Impact of the Year" award.
 2005 Kershaw sweeps Blade Magazine's Blade Show with an unprecedented 4 wins—E.I., model 1700, "Most Innovative American Made Knife of the Year," DTSF, model 1501, "World Knife of the Year," Ken Onion's "Chef's" model 160500, "Kitchen Knife of the Year," & the Spyderco Spyder, model 1500, "Knife Collaboration of the Year".
 Ken USA 100, and Kershaw Knives, in proud partnership with the National Veterans of America, introduce 21 (Twenty-One) Knives, a NEW series of combat-ready knives for military and law enforcement use.

SPEEDSAFE®
 TECHNOLOGY WITH AN EDGE

SpeedSafe® is the patented, assisted-opening system built into many of Kershaw's best-selling Ken Onion knives. SpeedSafe assists the user to smoothly open the knife with a manual push on the blade's thumb stud or Index-Open system.

Removable Pocket Clip
 The Scallion handles are drilled for a tip-down clip carry, or the clip can be removed completely.

Tip Safety Lock
 The tip lock available on many of the Ken Onion SpeedSafe models provides added security to assure that the blade will not deploy while clipped into your pocket.

RESPONDER

Model 1078

Steel.....AUS8A stainless-steel with
Black Teflon® coating
Handle...Double injection-molded
Santoprene®
Blade.....3 3/4 in. (9.8 cm)
Overall...8 3/4 in. (22.3 cm)
Weight...4.8 oz.
Includes Kydex®
sheath

Blunt Tip Blade

Kershaw's Responder has a dull
(non-sharpened) blunt tip for easy and
safe use.

The new Responder features a fixed blade with full-tang construction and a non-slip Santoprene® handle. The partially serrated blade and cutting hook zip through most material with ease—including line, webbing, clothing and seat belts—but the tip is blunt for safety. The multi-function Kydex® sheath offers multiple carry options and has both cord eyelets and strap slots.

Responder Glass Breaker Tip

It's small, but it can be a real lifesaver. In an emergency, a sharp blow with the carbide tip cracks windshield glass—enabling trapped accident victims to escape.

Onion Styling in Thumb Stud Opening Knives

For knife users who want a quality knife at a value price, Kershaw's Storm and Vapor lines of folding knives provide the answer. All Vapor models feature a sleek, high-tech look combined with super-smooth one-handed, manual

opening. The stainless-steel handles are decoratively drilled for an industrial-tech look. This open construction provides for a strong, yet airy, design. Choose from two sizes and two finishes; bead-blasted

stainless steel or Titanium-nitride coated stainless. The Storms, in two sizes, provide rugged styling with sure-grip Trac-Tec handle inserts. Whichever you choose, these everyday carrying knives offer plenty of flair.

Locking Liner

Locks the blade into position after the blade is deployed.

To release the locking liner simply press the spring loaded lock as shown to your left and the blade will easily fold back into the handle.

High-Performance, Hard-Working Knives

Kershaw's Liner Action knives feature light, strong die-cast aluminum frames, razor-sharp blades, and our secure locking liner. The liner holds the quality blade securely in place, yet releases easily when they're ready for use.

Our Liner Action models also include a convenient thumb stud for one-handed opening. All models except the 2410 and 2410ST include a removable pocket clip.

LINER ACTION

Specialty Tools for the Angler

Kershaw fillet knives always feature quality high-carbon stainless-steel blades with the ideal degree of flex for fast and easy filleting. So what could be better? Power. Plug our new Electric Fillet Knife into any standard outlet and glide

through every fillet job. There are two blade sizes and the Electric Fillet even comes with a handy storage bag.

For electricity-free filleting, choose one of our fixed-blade fillet knives with sure-grip handles or the 7-Step Fillet Knife, which

adjusts from 5 1/2 to 9 inches. For the ultimate in compact filleting, go for the Folding Fillet Knife. Pair any fillet with our compact and durable Skeeter Fly-Tying Scissors.

KNIVES

1974

Kershaw opens for business with its on-hoist, lifetime guarantee.

1978

Kai Cutlery Co., Ltd. of Japan purchases Kershaw Knives and creates Kai USA, Inc.

1982

Kershaw expands line of Field knives, Folding Pocket knives, and adds its Floating Fish Fillet knives.

1986

In memory of Colley Wade Officer (1902-1984) the D.W.O. model 3000 was added to the Officer Ranch Series.

1990

New series added to the Kershaw product line: American Hand Chisel, Stag, Sober, South Forkers, Manuka work knives, and a new line of dress knives and accessories.

1994

Kershaw's ever popular Blade Trader series receives a new handle design, and the line is expanded to include a Hunter's Blade Trader and Fisherman's Blade Trader.

1995: Two new series added to Kershaw's product line: Lion Lock models and the unique Lever Action series.

1996: Alpaca Blade Trader model 10944A, with patented out-hook opening blade added to line.

1997: Kershaw introduces the Multi-Tool model 10950C, and updates patents on its unique, adjustable fishing jaws.

Fit More Tools in Less Space with Blade Traders

Kershaw's Blade Trader technology provides the convenience of multiple, interchangeable blades and tools in a single handle. With the Blade Trader's exclusive Quik-Lock mechanism, you can quickly, easily, and safely trade blades and tools-in seconds. The quality steel used to make each blade or tool is matched to its specific use.

CAMP TOOL TRADER

Model 1091CT

Saw blade.....6 in. (15.2 cm)
Spatula.....3 5/8 in. (9.2 cm)
Spoon.....3 5/8 in. (9.2 cm)
Fork.....3 in. (7.5 cm)
Cutting board.....10 3/4" x 8"
(27.3 cm x 20.3 cm)
Weight.....48.9 oz.
Includes Hunter green case

DELUXE BLADE TRADER

Model 1099DBT

Steel.....420J2 stainless-steel, saw steel
Handles.....Co-polymer (two)
Cook's blade.....6 in. (15.2 cm)
Fish fillet blade...6 in. (15.2 cm)
Saw blade.....6 in. (15.2 cm)
Carving blade.....6 in. (15.2 cm)
Bread blade.....6 in. (15.2 cm)
Utility blade.....4 in. (10.2 cm)
Weight.....29.3 oz.
Includes black nylon storage case

Each non-slip Blade Trader handle is designed to reduce hand fatigue. All Blade Traders also include a handy storage system. There are six different Blade Trader sets—from combinations for hunters and fishermen to our campsite-ready Camp Tool Trader that includes two Blade Trader handles for extra convenience around the camp stove.

2002

2006

Kershaw's first knife, the Speed-Glide, was introduced in 1950 and won Blade Magazine's Blade Show "Best Knife of the Year" award.

1999, Kershaw's 50th anniversary. Blade Magazine's Blade Show "Best Knife of the Year" award.

2001, Kershaw's first knife, the Speed-Glide, was introduced in 1950 and won Blade Magazine's Blade Show "Best Knife of the Year" award.

2001, Kershaw's first knife, the Speed-Glide, was introduced in 1950 and won Blade Magazine's Blade Show "Best Knife of the Year" award.

Kershaw introduces the Speed-Glide, model 1094HBT, the first knife with a "bow tie" mechanism, won Blade Magazine's Blade Show "Best Knife of the Year" award.

2003, Kershaw introduces the "Classic" series, model 1094HBT, won Blade Magazine's Blade Show "Best Knife of the Year" award.

2004, Kershaw introduces the "Classic" series, model 1094HBT, won Blade Magazine's Blade Show "Best Knife of the Year" award.

2005, Kershaw introduces the "Classic" series, model 1094HBT, won Blade Magazine's Blade Show "Best Knife of the Year" award.

Kat USA Ltd. and Kershaw Knives, in joint partnership with the President of America, introduced the "Classic" series, model 1094HBT, won Blade Magazine's Blade Show "Best Knife of the Year" award.

HUNTER'S BLADE TRADER

Model 1094HBT

Steel.....420J2 stainless-steel,
saw steel
Handle.....Co-polymer
Hunting blade.....3 1/2 in. (9.0 cm)
Saw blade.....6 in. (15.2 cm)
Weight.....9.2 oz.
Includes black nylon
sheath

Changeable Blades

Grasp the handle, and with your thumb, press upwards on the underside of the Quick-Lock mechanism, continue pressing upward on the mechanism until the blade and "bow tie" are exposed. The blade or tool can be removed from the "bow tie" and a new blade or tool sealed onto the "bow tie" (when seating the blade or tool onto the "bow tie," make sure to guide it into place, top edge first, if you attempt to start with the bottom edge of the blade or tool the locking mechanism may not return to its down position). Complete the task by returning the mechanism to its closed (down) position as shown by the red arrow.

Quick-Lock Mechanism

It is normal for a slight gap to be visible from the under side on the mechanism between the blade and the handle, exposing part of the bow tie as shown to your left by the two arrows.

SPORTSMAN'S BLADE TRADER

Model 1095SBT

Steel.....420J2 stainless-steel, saw steel
Handle.....Co-polymer

Compact, Versatile, Multi- Functional Tools

The unique Kershaw Two Can is a
combination knife and scissors tool.
The patent-pending tool features two

blades that can be used separately or
together. Open one blade and use the Two
Can like any pocketknife. But when only a

pair of scissors will get the job done, open
the Two Can's second blade and you've got
an easy-to-use pair of scissors.

For Kershaw & Partners, Teamwork Works

Kershaw is proud to join forces with other fine organizations and companies to bring you a variety of quality tools—tools that serve a greater purpose. For instance, Kershaw has teamed up with the National Wild Turkey Federation to offer five different hunting knives and sets, each emblazoned with the handsome National Wild Turkey Federation logo. A portion of the proceeds from each sale benefits the Federation.

Kershaw is also manufacturing a selection of knives and tools exclusively for Jeep®. Each offers Kershaw's renowned technology and performance paired with Jeep's rugged style, quality—plus the popular Jeep logo.

Kai USA Ltd. and Kershaw Knives, in proud partnership with the Paralyzed Veterans of America, introduce E1 (Zero Tolerance) Knives, a NEW series of combat-ready knives for military and law enforcement use.

Shun Ken Onion Chef's Knife.

CHEF'S
Model DM0500
Blade.....8"(20.3cm)
Weight...9.2 oz.

This knife deserves special treatment—and it gets it. The Ken Onion Shun comes complete with its own bamboo stand that not only protects its fine-honed edge, but also displays this handsome knife to perfection.

Blade Magazine's Kitchen Knife of the Year

Kai USA Ltd. is also known for producing high end kitchen cutlery under the Shun brand name and is also available from Kershaw's state-of-the-art 55,000 sq. ft. facility located

in Tualatin, Oregon, a suburb of Portland. Please contact us for a catalog at 800.325.2891 or visit our website at www.kershawknives.com.

LIABILITY DISCLAIMER

Kershaw Knives are intended and sold for legitimate sporting purposes only. The purchase, use, and ownership of knives are subject to a wide variety of local laws and regulations. Certain knife styles, blade designs, and blade lengths are not allowed in specific areas. In light of recent events involving national security, knives may not be permitted in government buildings or on government property (such as court houses, federal offices, national monuments, and airports), and government officials may take the position that knives are "weapons" under applicable laws. Due to the complexity and constantly changing nature of these laws and regulations, it is impossible for Kershaw Knives, to be aware of every restriction in every location in which our knives may be sold or carried. It is the responsibility of the buyer to investigate and comply with the laws and regulations that apply in his or her specific area. You, and not Kershaw Knives, are solely responsible for any claims resulting from violation of these laws and/or regulations.

Kershaw products are made in the USA, Japan, Canada, Taiwan, Mexico, Sweden and China as indicated on the product.

We reserve the right to change specifications, materials, or discontinue products at any time without notice.

LIMITED LIFETIME WARRANTY

Kershaw products are guaranteed for the lifetime of the original owner to be free of defects when received from the factory. Any product we find to be defective in its original material, construction, or workmanship will be repaired or replaced with the same item or one of equal value at no charge. (Of course, normal wear, abuse such as prying with the knife, or neglect are excluded from this non-transferable warranty.) For warranty service, please return product via UPS or insured mail. Include your name, address, telephone number, proof of purchase (sales slip), and a short explanation of the warranty service requested to the address below. Please allow 4-6 weeks for delivery.
