kershaw®

Kai USA, Ltd., founded as Kershaw Knives in 1974, began with one mission: to design and manufacture tools that knife users would be proud to own, carry, and use. Today, premium materials, state-of-the-art manufacturing, extremely tight tolerances, and meticulous craftsmanship ensure that each Kershaw knife or tool provides a lifetime of performance and pride of ownership. The Kershaw brand is especially known for innovative technologies and materials, resulting in numerous industry awards. We manufacture many of our products in our 55,000 sq. ft. facility located south of Portland Oregon, in the city of Tualatin. Our campus houses a state-of-the-art manufacturing facility, our design, engineering, and manufacturing teams, as well as the customer service experts who sell and support our Kershaw brand knives and tools. Kershaw products are backed with a Limited Lifetime Warranty.

THE ABCS OF EDC

EDC, short for everyday carry, is about much more than just the stuff you carry around in your pockets. Your EDC are the things you'd be lost without, the things you always check your pockets for—things that are indispensable to modern daily life, as well as items that can assist in emergencies.

For most, EDC starts with wallet, keys, and phone. But then it gets personal. An electrician might also EDC a wire stripper. A programmer might carry a mini USB or extra cable. Your EDC depends on your life and your specific needs. It can even be a statement about personal style and values.

Plus the "K"

With EDC's core principles of utility, preparedness, and value, it's no surprise that a pocketknife ranks high on the list of everyday

carry essentials. It's also no surprise to find that Kershaw is the pocketknife of choice for many savvy EDCers.

Kershaw offers top performance and plenty of bang and for every hard-earned buck, and for every budget. It's the one you can count on for award-winning technologies, innovative design, advanced materials, and meticulous state-of-the-art manufacturing. The result of all this? Genuine pride of ownership every time you carry a Kershaw.

Whether you just need to be ready for everyday life or ready for just about anything, the name that should be on your blade, the name that should be in your pocket, is Kershaw.

What are YOU carrying?

LAUNCH 2 - BLACK SERRATED 7200BLKST • P.11

LAUNCH 7 7900GRYBLK • P.12

DIVIDEND 1812 • P.23

DIVIDEND - GRAY ALUMINUM 1812GRY • P.23

Two new autos make their appearance this year—a Launch 2 with partial serration and the brand new, aggressive-looking Launch 7 designed by Tim Galyean. The all-made-in-the-USA Dividend, in two handle styles, follows up on our successful Link series.

LINK - NAVY BLUE BLACKWASH 1776NBBW • P.25

BLUR - CAMO 1670CAMO • P.26

LEEK - CARBON FIBER 1660CF • P.30

LEEK - CAMO 1660CAMO • P.30

SCALLION - BLACK 1620SWBLK • P.28

In the new-looks-for-old-favorites department, check out 2017's handsome additions—from a new blue Link to an carbon fiber-handled Leek that has a decidedly high "wow" factor.

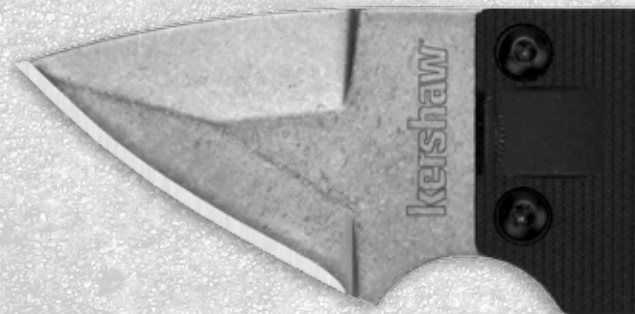

AM-3 2335 • P.19

AM-4 2330 • P.19

AM-5 2340 • P.20

AM-6 2345 • P.20

For 2017, Kershaw is proud to introduce a selection of some of the most iconic AL MAR™ KNIVES—updated and made more affordable for a new generation of knife enthusiasts. Fit and finish on this series is truly outstanding—as it should be to honor Al's exemplary designs.

On this page, you'll see some brand new faces, and one familiar one. For the new, Kershaw teamed up with Gustavo T. Cecchini, one of the most sought-after custom knifemakers today. He is known for his innovative technologies and the striking lines of his custom designs. The new Hops and Malt (yes, of course, they have bottle openers) show off his unique style. We also added a new rescue knife and a folding dagger. The familiar face is the Natrix, our own version of a knife that has—apparently—been the envy of certain other knifemakers. And now we're taking it back.

HOPS 5515 • P.34

MALT 5520 • P.34

NATRIX 7007 • P.34

BARSTOW 3960 • P.34

BARRICADE 8650 • P.34

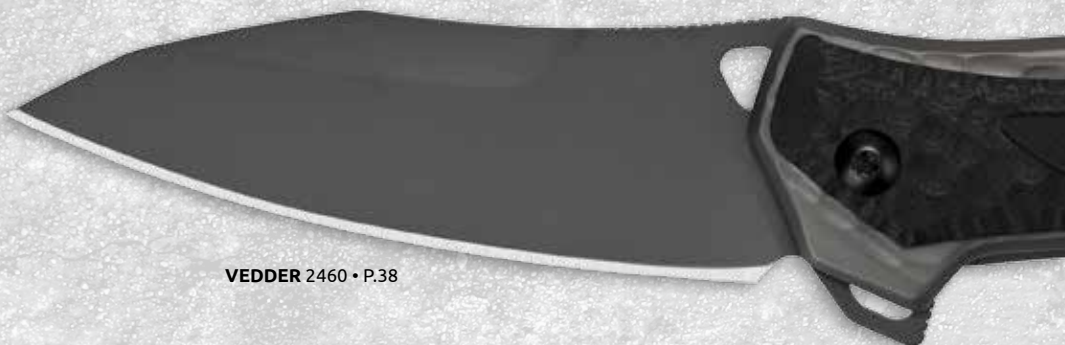

FLITCH 3930 • P.38

FLOURISH 3935 • P.38

ERIS 1881 • P.38

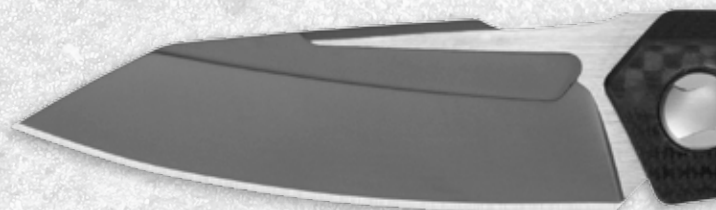

VEDDER 2460 • P.38

You want style? We've got style. Two-tone blade finishes, decorative blade machining and swedges, carbon fiber handle overlays, and an interesting two-layer G-10 handle treatment make the new Flitch, Flourish, Eris, and Vedder outstanding EDC choices when you really want to stand out.

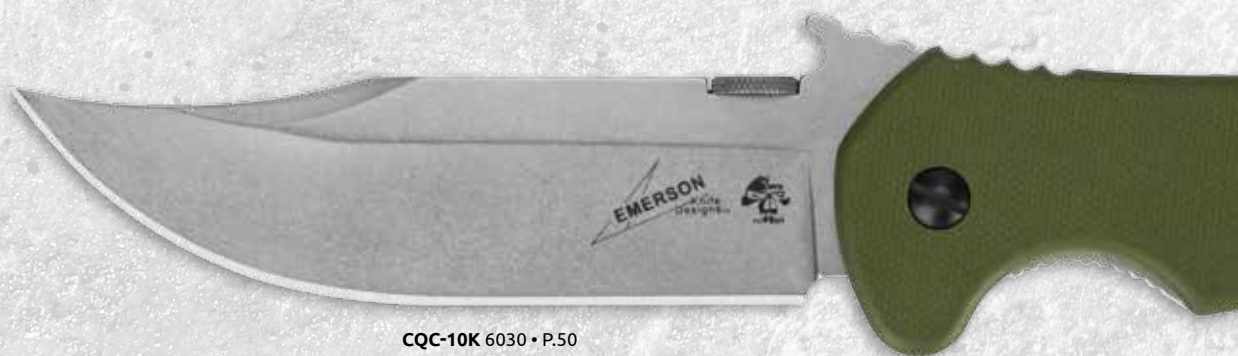

DEADLINE 1087 • P.47

REVERB 1220 • P.47

FRAXION 1160 • P.47

CQC-10K 6030 • P.50

CQC-11K 6031 • P.50

Kershaw offers choices from ultra-modern EDCs to knives that are ready for the great outdoors. Two new Kershaw—Emersons join the pack. These two knives were originally designed as hunting knives. Our versions are equally adept at camping, bushcrafting, or other outdoor activities, too. On the EDC end of the spectrum, the Fraxion and Reverb offer the cool of carbon fiber, while the Matt Diskin-designed Deadline features Kershaw's Tuned Detent System (TDS)[™] to ensure a detent that's just right.

SHUFFLE II - OLIVE 8750TOLBLK • P.55

PUB - BLACK 4036BLK • P.53

PUB - BLUE 4036BLU • P.53

PUB - CARBON FIBER 4036CF • P.53

AGILE 1558 • P.53

SHUFFLE DIY 8720 • P.53

Multi-function tools are always handy. For 2017, we're adding a handful of handy to the Kershaw lineup with eight new multi-function knives. The Shuffle goes DIY with a new bit set and driver. The Shuffle II gets a new olive handle. And yes, the bottle opener is still there on both of them. The Rick Hinderer-designed Agile features an interchangeable backspacer. You get three backspacers, a different tool in each one. The Pub, in three different handle styles, includes a blade, bottle opener, screwdriver tip, and key chain attachment. And the PT-1 and PT-2 (on page 9) are handy key chain tools with a variety of functions.

3-PC EMERSON COOK'S SET 6100 • P.50

PT-1 8800 • P.69

PT-2 8810 • P.69

Ernest Emerson has long wanted to bring his knife design principles to the kitchen. Partnering with Kershaw, the new Kershaw-Emerson Cook Set does just that. Those familiar with Emerson design will easily recognize the characteristic handle shapes, time-tested for secure grip and function. The Cook Set includes three must-have kitchen knives—the chef's knife, paring knife, and bread knife.

KERSHAW-AL MAR™ KNIVES

Timeless AL MAR™ KNIVES designs meet Kershaw's precision manufacturing and meticulous fit and finish to bring you updated versions of some of the most iconic AL MAR™ KNIVES. Kershaw is proud to introduce four new models designed to make these famous designs available to more people. For some models, we've added SpeedSafe® assisted opening and flippers for quick and easy one-handed opening. Back locks have been replaced by frame and liner locks. And all feature top-quality materials, like polished and crowned G-10 and 8Cr13MoV steel. With our line of Kershaw-AL MAR™ KNIVES, these brilliant, classic designs are refined and modernized for a new generation of knife enthusiasts.

Emergencies?
Yeah, they happen.
EDC and be ready.

EDC-SPEEDSAFE

EDCing helps you get and stay organized. No running around for your stuff before heading out. You know what you need and exactly where your gear is. At all times.

For cutting and slicing, we guarantee your EDC knife works way better than a house key, that pair of scissors you can't actually find when you need them, or your teeth.

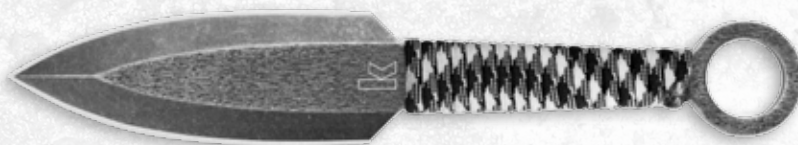

A close-up photograph of a person's lower leg and foot. They are wearing blue denim jeans and black leather boots with silver studs. A black knife sheath is attached to the leg of the jeans. The person's hand, wearing a silver chain bracelet, is pulling the knife out of the sheath. The knife has a black handle and a silver blade.

TEAM Kershaw®

These are some of the people we admire. We admire their dedication to their sport. We admire their dedication to sharing it with others. We admire how they put Kershaw knives to use as a part of their lives. They also help us demonstrate how important Kershaw knives are—in every day life as well as in naturally knifeheavy sports like hunting. They help us get our brand out before a variety of key knife-buying audiences and even help us introduce the Kershaw brand to new audiences. It's not an easy job. It's definitely worthy of admiration. And it's why we're so proud to sponsor these terrific teams, organizations, and individuals.

BLADE STEELS

SANDVIK 14C28N

This high-performance steel was developed in a partnership between Kershaw and Sandvik Steel. Offers excellent corrosion resistance and the ability to be hardened to 58–60 Rockwell.

8CR13MOV

Kershaw precision heat-treats 8Cr13MoV steel to bring out its very best high-performance characteristics: the ability to take and hold an edge, strength, and hardness.

8CR14MOV

The formula for this steel has additional chromium for added stain resistance. It also benefits from Kershaw’s expertise in precision heat treatment.

420J

Highly stain resistant, but ductile, this steel is excellent for use where “flex” is desirable, for example, in fillet knives.

420HC

This modified 420 steel has higher amounts of carbon and chromium to boost hardenability and corrosion resistance. It is an excellent everyday steel: tough, corrosion resistant, easy to sharpen and takes a good edge.

CPM154

This powdered metallurgy steel has a more uniform distribution of carbides so it takes and holds an excellent edge. Also offers good corrosion resistance, wear resistance, and toughness.

D2

This “semi-stainless” tool steel is known for excellent wear resistance and good toughness.

DIN 1.4116

Exceptionally corrosion resistant and very tough, this German stainless steel is one of the most popular steels for kitchen knives. It is very easy to resharpen when the time comes.

S30V

All-around premium knife steel takes and holds an edge extremely well and is also very tough and wear resistant.

65MN

A tough, durable carbon steel designed for hard-use applications such as Kershaw’s Camp Series machetes.

3CR13

A value-priced high-chromium stainless steel.

4CR14

A value-priced steel; very highly stain resistant.

BLADE FINISHES & COATINGS

BEAD-BLASTED FINISH

The knife blade is "blasted" or sprayed with a mixture of fine media, including glass and aluminum oxide beads, under high speed and pressure. This smooths the blade surface and creates a soft, non-reflective, matte look. Depending on the media, this finish can produce a darker or a lighter blade color.

BLACK-OXIDE COATING

A chemical bath converts the surface of the steel to magnetite; it enhances appearance and adds some corrosion resistance.

BLACKWASH FINISH

Our BlackWash finish produces a vintage look like that of well-used tool or favorite, broken-in pair of jeans. Kershaw products may have DLC BlackWash or black-oxide BlackWash finishes.

DLC COATING

Diamond-Like Carbon (DLC) coating displays properties similar to those of natural diamond, including hardness, wear resistance, and reduced friction.

DUAL FINISH

Sometimes Kershaw will combine two different blade finishes on a single blade, for example, satin finish on the blade upper and stonewash on the lower part of the blade.

POWDERCOAT

The coating is applied as a fine powder and cured under heat. This creates a smooth, even, and tough coating.

PVD COATING

PVD stands for Physical Vapor Deposition. Specialized materials are vaporized via a vacuum process. Then the vaporized material is deposited as a thin layer on selected objects. In our case, it enables us to finish our blades and/or handles with a thin coating that adds color and offers excellent wear and corrosion resistance.

SATIN FINISH

A Kershaw satin finish will typically show a faint pattern of vertical lines across the blade. It is a shinier finish than bead blasting and somewhat lighter in color.

STONEWASHED FINISH

Blades are tumbled with ceramic "stones," which gives the blade surface a desirable roughened or scuffed look. The look can be pronounced or subtle. The finish helps hide scratches and fingerprints.

TITANIUM CARBO-NITRIDE

Kershaw also uses titanium carbo-nitride to produce an attractive black or grey blade coating that increases the blade's hardness, helps maintain the edge, and increases the lifetime of the blade.

HANDLE MATERIALS

ANODIZED ALUMINUM

Anodizing makes aluminum stronger and enables Kershaw to add scratch and fade resistant color to knife handles.

CARBON FIBER

Carbon fiber atoms are bonded together in crystals aligned in long strands, then woven together like fibers. Combined with resin to make the fibers rigid, carbon fiber makes a knife handle material that is extremely strong and extremely lightweight.

CO-POLYMER PLASTIC

A co-polymer is a compound of two or more different molecules, chosen for specific characteristics. The co-polymers Kershaw uses for knife handles generally have a slightly rubbery texture to improve grip security.

G-10

An epoxy-filled woven glass fiber; it is extremely stable, unaffected by temperature changes, and makes excellent handles and handle scales for knives.

GLASS-FILLED NYLON

Nylon synthetic polymer is reinforced with glass threads for increased strength, stiffness, and dimensional stability combined with excellent wear resistance.

K-TEXTURE GRIP

An exclusive texture and pattern used on the handle of certain Kershaw knives. K-Texture enhances a secure grip.

STAINLESS STEEL

An alloy of iron and carbon, most steel also has additional elements alloyed in it to enhance specific characteristics. As a handle material, steel is strong and attractive.

TRAC-TEC INSERTS

A rough-surfaced insert that provides additional friction for a non-slip grip.

LOCKS

FRAME LOCK

In a frame lock knife, the knife handle—its “frame”—consists of two plates of material on either side of the blade. When the knife is opened, one side of the frame butts up against the backend of the blade and prevents the blade from closing until released. The thickness of the frame material blocking the blade open makes the frame lock extremely sturdy.

HAWK LOCK

The Hawk Lock uses a principle similar to other locks to secure the blade open. But instead of part of the frame or liner moving into place, a spring-loaded latch plate in the knife handle moves to contact a steel pin on the blade, locking the blade open. To close the knife, just pull the lock slider toward the butt of the knife and fold the blade back into the handle.

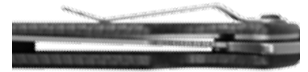

INSET LINER LOCK

The inset liner lock is a Kershaw variation on the liner lock. Kershaw insets a sturdy steel plate on the inside of the knife's handle. It is riveted into place in a custom-machined cutout on the interior of the handle. This enables us to make a knife with a slimmer profile that won't weigh your pocket down, while still providing the strength and security of a locking liner.

LINER LOCK

The most common of today's blade-locking systems. The handle consists of two metal plates (the “liner”) on either side of the blade. When the knife is opened, one side of the liner butts up against the backend of the blade and prevents the blade from closing until released. A secure and convenient way to make using a Kershaw folding knife even safer.

LOCK BACK

The oldest of the popular blade-locking systems, yet the principle is the same as with the others. Once the knife is opened, a steel bar locks into place behind the blade and prevents the knife from closing until released by the knife user.

PUSH BUTTON LOCK

Like Kershaw's other locking systems, once the blade is open, a mechanism blocks the butt end of the blade and prevents it from closing accidentally. In this case, a spring-loaded lock is built into one side of the handle that must be depressed in order to unlock the blade.

SUB-FRAME LOCK

The Kershaw sub-frame lock is a variation on the traditional frame lock. In this case, a piece of a lighter weight frame, like G-10, is machined out and a piece of steel is riveted into its place. This steel acts like a standard frame lock. It enables us to make a knife with a slimmer profile, while still providing the strength and security of a frame lock.

TIP-LOCK

The tip-lock can be found on all Leek, Scallion, and Chive SpeedSafe knives. It's a simple slider that, when engaged, ensures the blade will not accidentally open. It's especially helpful in cases where the knife might be juggled in a briefcase, backpack, or purse.

POCKETCLIPS

SINGLE-POSITION

The pocketclip is mounted in a single, fixed position on the knife handle.

REVERSIBLE

Right-handed, tip-up or tip-down
OR
Right- or left-handed, tip-up

3-POSITION

Right-handed, tip-up or tip-down
AND
Left-handed, tip-up

4-POSITION

Right-handed, tip-up or tip-down
AND
Left-handed, tip-up or tip-down

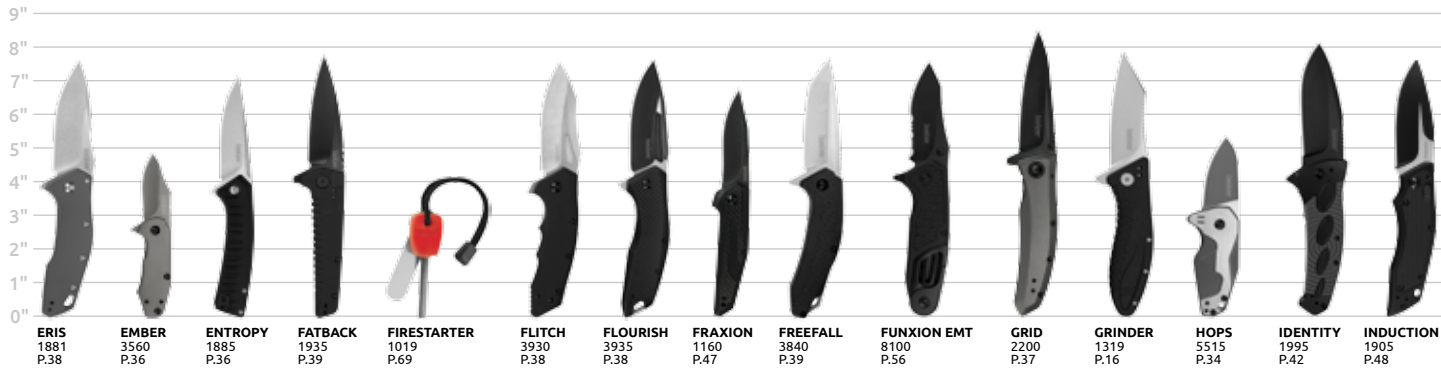

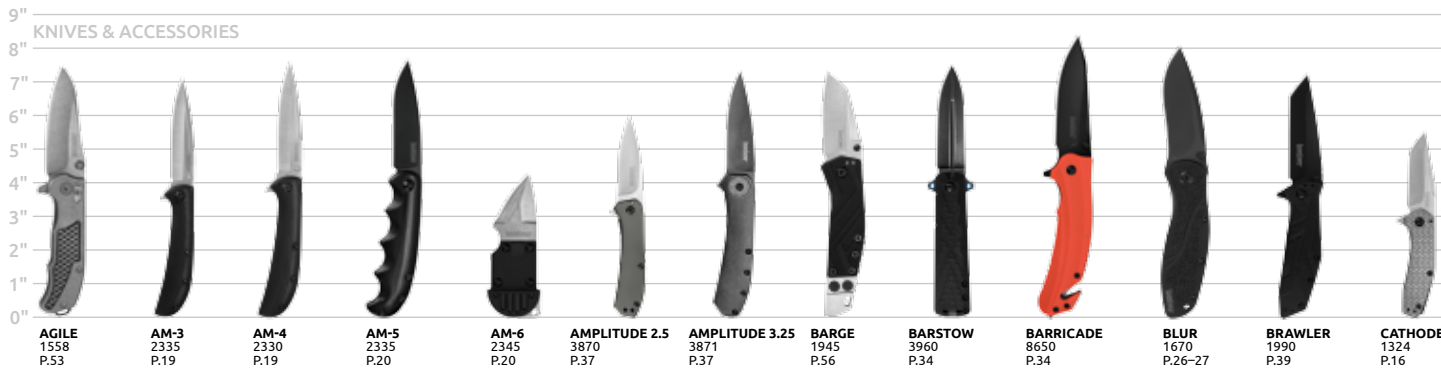

DEEP-CARRY

This specially designed pocketclip is positioned at the very end of the handle so that the knife can be carried deeper inside the pocket.

LIMITED LIFETIME WARRANTY

Kershaw Knives from Kai USA Ltd. carry a limited warranty for the lifetime of the original owner, except when stated otherwise. We guarantee our knives against manufacturing defects in material and construction and to perform as advertised when properly used and maintained. The Limited Lifetime Warranty is non-transferable and does not extend to normal signs of wear, rust, damage or breakage due to improper use, improper maintenance, accidents, loss or theft. Any product we determine to be defective will be repaired or replaced solely at our discretion. To receive warranty repair or replacement, the owner must send the product to be evaluated by Kai USA Warranty Services in our Tualatin, Oregon headquarters. In addition to the provisions of this warranty, the owner may also have other rights that can vary by state. The Limited Lifetime Warranty does not apply to the TX Tool. No other warranties are implied or expressed other than what is specifically stated here. If you accidentally break your Kershaw folder's blade, we can replace it for just \$10. Blades that break due to a manufacturing defect will still be replaced under warranty, free of charge.

LIABILITY DISCLAIMER

Kershaw Knives are intended and sold for legitimate sporting and/or culinary purposes only. The purchase, use, and ownership of knives are subject to a wide variety of local laws and regulations. Due to the complexity and constantly changing nature of these laws and regulations, it is the responsibility of the buyer to investigate and comply with the laws and regulations that apply in his or her specific area. You, and not Kai USA Ltd., are solely responsible for any claims resulting from violation of these laws and/or regulations. Any use of these products other than cutting is considered misuse and abuse. Kai USA Ltd. is not responsible for any injuries or damages caused by misuse and/or abuse.

WARNING!

Knives are extremely sharp tools and should only be used or handled with the utmost care and caution. Any use other than cutting is considered misuse and abuse—and will void your warranty. Kershaw Knives/Kai USA Ltd. is not responsible for any injuries resulting from misuse or abuse of the product.

We reserve the right to change materials and specifications without notice.
