

kershaw

Kai USA, Ltd., founded as Kershaw Knives in 1974, began with one mission: to design and manufacture tools that knife users would be proud to own, carry, and use. Today, premium materials, state-of-the-art manufacturing, extremely tight tolerances, and meticulous craftsmanship ensure that each Kershaw knife or tool provides a lifetime of performance and pride of ownership. The Kershaw brand is especially known for innovative technologies and materials, resulting in numerous industry awards. We manufacture many of our products in our 55,000 sq. ft. facility located south of Portland Oregon, in the city of Tualatin. Our campus houses a state-of-the-art manufacturing facility, our design, engineering, and manufacturing teams, as well as the customer service experts who sell and support our Kershaw brand knives and tools. Every Kershaw product is backed with a Limited Lifetime Warranty.

> We reserve the right to change materials and specifications without notice.

HEN YOU'RE CARRYING A KERSHAW, you're carrying a pocket-sized piece of precision that's ready to go to work for you.

With a Kershaw, you've got an every day carrying knife that can tame any cardboard box and liberate any purchase from its plastic packaging. You've got a sporting knife that can make hunting, fishing, and camping even better, a work knife that won't let you down, and a tactical knife that will ensure you're ready for anything.

Kershaw means more bang for every hard-earned buck no matter what your budget. From the outstanding style of our value-priced Starter Series to the premium tech and materials of our made-in-the-USA models, each Kershaw is built to perform. They're solid, crafted, reliable, and always backed by our famous limited lifetime warranty.

When you're carrying a Kershaw, it just feels right, in your pocket and in your hand. You can count on Kershaw's awardwinning technologies, advanced materials, and state-of-the-art manufacturing. The solid *THWACK*! of the Kershaw blade lockup is the sound of proof positive. For design, innovation, quality, and genuine pride of ownership, Kershaw is the one.

So now there's really only one question:

What are YOU carrying?

Looking for something different? Check out our very own parang, the Camp 12. Or choose our popular Shuffle in one of three new colors—as well as a new larger size. 2015 is also the debut of our set of three throwing knives, lasered with the Kershaw "K" and with paracord-wrapped handles.

SHUFFLE 8700PURBW 8700TEALBW 8700LIMEBW P.47

CAMP 12 1072 P.58

A "K" for your keychain. Our newest tool is keychain-ready with bottle opener, screwdriver tip, and the Kershaw logo "K" shape. For your campsite, there's the new Tinder mini ax with pry bar, hammer, hex wrenches and more.

Kershaw's new Made in the USA Link—model number 1776—is coming your way in 2015. Assisted opening, sleek good looks, lightweight nylon or aluminum handle.

Tactical and practical, the RJ Tactical 3.0 is a smaller tactical knife with plenty of style.

COST SUSTON

SHIELD 3920 P.33

Based on Rick Hinderer's Eklipse, Kershaw's new-for-2015 Shield is a precision pocketful of reliability. The ergonomic handle is contoured for a solid grip, and paired with a Kershaw-sharp blade. Even better, we built it so that you get all this custom style and precision at a value price.

BLUR - NAVY BLUE STONEWASH 1670NBSW P.25

The ever-popular Blur makes its 2015 debut in blue with a handsome stonewashed blade. As always, it's equipped with SpeedSafe and ready to rock.

TEAM **Kershaw**®

These are some of the people we admire. We admire their dedication to their sport. We admire their dedication to sharing it with others. We admire how they put Kershaw knives to use as a part of their lives. They also help us demonstrate how important Kershaw knives are—in every day life as well as in naturally knifeheavy sports like hunting. They help us get our brand out before a variety of key knife-buying audiences and even help us introduce the Kershaw brand to new audiences. It's not an easy job. It's definitely worthy of admiration. And it's why we're so proud to sponsor these terrific teams, organizations, and individuals.

PROFESSIONAL ROUGHSTOCK

Professional Rough Stock includes bareback riding, saddle bronc riding, and bull riding. For each of its three events, half the score comes from the rider's ability to ride well, and half from the bucking performance of the animal. It takes skill and guts to be a PRS rider. Kershaw is proud to be a major PRS sponsor.

CHRIS COLE

Pro skateboarder Chris Cole was named *Thrasher* Magazine's Skater of the Year in 2005 and again in 2009. Chris wants the world to see that skateboarding breeds individuals who are athletic, creative, and driven. His personal credo of "live rad and die proud" has guided Chris throughout his career. Chris proudly carries a Kershaw.

JASON MCCALL

Jason McCall is a six-time NPRA Finals bullfighter, the 2008 Philomath Frolic & Rodeo Freestyle Bullfight Champion & 2012 Professional Roughstock Series World Finals Bullfighter. Jason takes pride in knowing that he's among the top bullfighters in the northwest and Kershaw takes pride in being one of his sponsors.

PETER MILLER

Peter Miller is the host of the Telly Award-

winning TV show *Bass 2 Billfish* with Peter Miller. He is an champion fisherman and an avid outdoorsman. Peter carries Kershaw not only when he's fishing, but also in his daily life.

MAJESTY OUTDOORS

Majesty Outdoors Television is an award-

winning, national televised series. Hosts Stephen West and Bill Blodgett take fatherless teenagers on their maiden outdoors adventure and positively impact the lives of these teenagers through once-in-alifetime experiences. Each teenager who appears on air receives a college scholarship once they complete high school.

BENNY SPIES

Benny shares his love for the outdoors and gives the world an honest representation of how the majority of Americans enjoy it in his Gun It with Benny Spies reality TV show. Benny enjoys "gettin' dirty, pullin' the trigger, sometimes casting a thousand times to catch one fish and havin' fun with friends, family, and the people I meet throughout the small towns I travel." We're looking forward to seeing how Benny puts his Kershaws to use in 2015.

OUTDOORS DAN

Outdoors Dan wakes up Des Moines, lowa and St. Louis, Missouri to the great outdoors every week. Kershaw is proud to help Dan get the good word on the great outdoors to all his fans in Iowa and Missouri.

SCOTT HAUGEN

Scott Haugen is a pro hunter, seminar leader, and author. He has appeared on hundreds of radio and television shows, penned over 1,400 magazine articles and written several books. Scott spends more than 200 days a year in the field. And he wouldn't have it any other way.

STEVEN PEEBLES

Steven Peebles has been riding bareback since high school. He is a five-time Wrangler National Finals Rodeo qualifier from 2009-2013 and finished second in the World Standings last season. spurred on by winning both round two and three at the WNFR. He was the Professional Rodeo Cowboys Association's Bareback Riding Rookie of the Year in 2009 and is currently ranked #2 in the World Standings. Steven was also the PRS World Champion and Finals Champion in 2012 and finished third overall in 2013.

BLADE STEELS

SANDVIK 14C28N

This high-performance steel was developed in a partnership between Kershaw and Sandvik Steel. Offers excellent corrosion resistance and the ability to be hardened to 58-60 Rockwell.

8CR13MOV

Kershaw precision heat-treats 8Cr13MoV steel to bring out its very best highperformance characteristics: the ability to take and hold an edge, strength, and hardness.

8CR14MOV

The formula for this steel has additional chromium for added stain resistance. It also benefits from Kershaw's expertise in precision heat treatment.

420J

Highly stain resistant, but ductile, this steel is excellent for use where "flex" is desirable, for example, in fillet knives.

420HC

This modified 420 steel has higher amounts of carbon and chromium to boost hardenability and corrosion resistance. It is an excellent everyday steel: tough, corrosion resistant, easy to sharpen and takes a good edge.

CPM154

This powdered metallurgy steel has a more uniform distribution of carbides so it takes and holds an excellent edge. Also offers good corrosion resistance, wear resistance, and toughness.

S30V

All-around premium knife steel takes and holds an edge extremely well and is also very tough and wear resistant.

D2

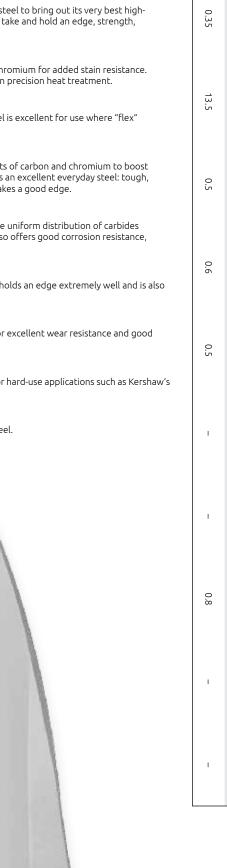

This "semi-stainless" tool steel is known for excellent wear resistance and good toughness.

65MN

A tough, durable carbon steel designed for hard-use applications such as Kershaw's Camp Series machetes.

3CR13

A value-priced high-chromium stainless steel.

BLADE FINISHES & COATINGS

BEAD-BLASTED FINISH

The knife blade is "blasted" or sprayed with a mixture of fine media, including glass and aluminum oxide beads, under high speed and pressure. This smooths the blade surface and creates a soft, non-reflective, matte look. Depending on the media, this finish can produce a darker or a lighter blade color.

BLACK-OXIDE COATING

A chemical bath converts the surface of the steel to magnetite; it enhances appearance and adds some corrosion resistance.

BLACK-OXIDE BLACKWASH

Our BlackWash finish produces a vintage look like that of well-used tool or favorite, broken-in pair of jeans. Kershaw products may have DLC BlackWash or black-oxide BlackWash finishes.

DLC COATING

Diamond-Like Carbon (DLC) coating displays properties similar to those of natural diamond, including hardness, wear resistance, and reduced friction.

DUAL FINISH

Sometimes Kershaw will combine two different blade finishes on a single blade, for example, satin finish on the blade upper and stonewash on the lower part of the blade.

BLACKWASH FINISH

Our BlackWash finish produces a vintage look like that of well-used tool or favorite, broken-in pair of jeans. Kershaw products may have DLC BlackWash or black-oxide BlackWash finishes.

POWDERCOAT

The coating is applied as a fine powder and cured under heat. This creates a smooth, even, and tough coating.

SATIN FINISH

A Kershaw satin finish will typically show a faint pattern of vertical lines across the blade. It is a shinier finish than bead blasting and somewhat lighter in color.

STONEWASHED FINISH

Blades are tumbled with ceramic "stones," which gives the blade surface a desirable roughened or scuffed look. The look can be pronounced or subtle. The finish helps hide scratches and fingerprints.

TITANIUM CARBO-NITRIDE

Kershaw also uses titanium carbo-nitride to produce an attractive black or grey blade coating that increases the blade's hardness, helps maintain the edge, and increases the lifetime of the blade.

TITANIUM OXIDE

When oxygen is introduced into the PVD process, the result is Kershaw's spectacular "rainbow" finishes. The Rainbow Chive, Scallion, and Leek feature this multicolored finish.

HANDLE MATERIALS

ANODIZED ALUMINUM

Anodizing makes aluminum stronger and enables Kershaw to add scratch and fade resistant color to knife handles.

CO-POLYMER PLASTIC

A co-polymer is a compound of two or more different molecules, chosen for specific characteristics. The co-polymers Kershaw uses for knife handles generally have a slightly rubbery texture to improve grip security.

G-10

An epoxy-filled woven glass fiber; it is extremely stable, unaffected by temperature changes, and makes excellent handles and handle scales for knives.

GLASS-FILLED NYLON

Nylon synthetic polymer is reinforced with glass threads for increased strength, stiffness, and dimensional stability combined with excellent wear resistance.

K-TEXTURE GRIP

An exclusive texture and pattern used on the handle of certain Kershaw knives. K-Texture enhances a secure grip.

STAINLESS STEEL

An alloy of iron and carbon, most steel also has additional elements alloyed in it to enhance specific characteristics. As a handle material, steel is strong and attractive.

TRAC-TEC INSERTS

A rough-surfaced insert that provides additional friction for a non-slip grip.

LOCKS

FRAME LOCK

In a frame lock knife, the knife handle its "frame"—consists of two plates of material on either side of the blade. When the knife is opened, one side of the frame butts up against the backend of the blade and prevents the blade from closing until released. The thickness of the frame material blocking the blade open makes the frame lock extremely sturdy.

INSET LINER LOCK

The Inset Liner Lock is a Kershaw variation on the liner lock. Kershaw insets a sturdy steel plate on the inside of the knife's handle. It is riveted into place in a custom-machined cutout on the interior of the handle. This enables us to make a knife with a slimmer profile that won't weigh your pocket down, while still providing the strength and security of a locking liner.

LINER LOCK

The most common of today's blade-locking systems. The handle consists of two metal plates (the "liner") on either side of the blade. When the knife is opened, one side of the liner butts up against the backend of the blade and prevents the blade from closing until released. A secure and convenient way to make using a Kershaw folding knife even safer.

LOCK BACK

The oldest of the popular blade-locking systems, yet the principle is the same as with the others. Once the knife is opened, a steel bar locks into place behind the blade and prevents the knife from closing until released by the knife user.

PUSH BUTTON LOCK

Like Kershaw's other locking systems, once the blade is open, a mechanism blocks the butt end of the blade and prevents it from closing accidentally. In this case, a springloaded lock is built into one side of the handle that must be depressed in order to unlock the blade.

SUB-FRAME LOCK

The Kershaw sub-frame lock is a variation on the traditional frame lock. In this case, a piece of a lighter weight frame, like G-10, is machined out and a piece of steel is riveted into its place. This steel acts like a standard frame lock. It enables us to make a knife with a slimmer profile, while still providing the strength and security of a frame lock.

TIP-LOCK

The tip-lock can be found on all Leek, Scallion, and Chive SpeedSafe knives. It's a simple slider that, when engaged, ensures the blade will not accidentally open. It's especially helpful in cases where the knife might be juggled in a briefcase, backpack, or purse.

POCKETCLIPS

SINGLE-POSITION

The pocketclip is mounted in a single, fixed position on the knife handle.

REVERSIBLE Right-handed, tip-up or tip-down OR Right- or left-handed, tip-up

3-POSITION Right-handed, tip-up or tip-down AND Left-handed, tip-up

4-POSITION

Right-handed, tip-up or tip-down AND Left-handed, tip-up or tip-down

DEEP-CARRY

This specially designed pocketclip is positioned at the very end of the handle so that the knife can be carried deeper inside the pocket.

LIMITED LIFETIME WARRANTY

Kershaw Knives from Kai USA Ltd. carry a limited warranty for the lifetime of the original owner, except when stated otherwise. We guarantee our knives against manufacturing defects in material and construction and to perform as advertised when properly used and maintained. The Limited Lifetime Warranty is non-transferable and does not extend to normal signs of wear, rust, damage or breakage due to improper use, improper maintenance, accidents, loss or theft. Any product we determine to be defective will be repaired or replaced solely at our discretion. To receive warranty repair or replacement, the owner must send the product to be evaluated by Kai USA Warranty Services in our Tualatin, Oregon headquarters. In addition to the provisions of this warranty, the owner may also have other rights that can vary by state. No other warranties are implied or expressed other than what is specifically stated here.

If you accidentally break your Kershaw folder's blade, we can replace it for just \$10. Blades that break due to a manufacturing defect will still be replaced under warranty, free of charge.

LIABILITY DISCLAIMER

Kershaw Knives are intended and sold for legitimate sporting and/or culinary purposes only. The purchase, use, and ownership of knives are subject to a wide variety of local laws and regulations. Due to the complexity and constantly changing nature of these laws and regulations, it is the responsibility of the buyer to investigate and comply with the laws and regulations that apply in his or her specific area. You, and not Kai USA Ltd., are solely responsible for any claims resulting from violation of these laws and/or regulations. Any use of these products other than cutting is considered misuse and abuse. Kai USA Ltd. is not responsible for any injuries or damages caused by misuse and/or abuse.

WARNING!

Knives are extremely sharp tools and should only be used or handled with the utmost care and caution. Any use other than cutting is considered misuse and abuse—and will void your warranty. Kershaw Knives/Kai USA Ltd. is not responsible for any injuries resulting from misuse or abuse of the product.

> We reserve the right to change materials and specifications without notice.
