# RISE TO THE NEXT LEVEL

They might ask us who we are. And we could say we're familiar, that we're just like everyone else—but we're the next generation.

We're here to inspire. To be fearless. To think out loud and blaze ahead into the great unknown.

When someone says jump, we fly. We don't hold on; we let go. Let our imaginations freefall.

We're here to take adventure to the next level. To push it further. One more catch, one more peak, one more hurdle.

There's no keeping us from overcoming the next challenge, creating a new evolution in superior craftsmanship and dominating the cutting edge of innovation.

Because we're here to make our mark, to break the mold and never back down.

We're here to take life to the next level.

"I've been carrying a pocket knife since I was 12, and there isn't a day you will find me without my Kershaw."

—Taylor Robert, X Games Gold Medalist, 2019 ISDE Champion

## KERSHAW ORIGINALS

Kershaw's in-house designs are award-winning, fan-winning, customer-winning originals. From the freshest new industry-leading designs to modern versions of classics, Kershaw Originals bring you a full range of choices. For style, innovative technology, quality materials, and plenty of value, we deliver. Whether it's your first venture into a quality pocketknife or it's time for a top-of-the-line Made in the USA automatic, you can count on Kershaw Originals to bring you the best.

Look for this icon designating KERSHAW ORIGINALS.

# MANUFACTURING

## PRECISION AND CRAFTSMANSHIP

Every Kershaw knife starts with American innovation, American design, and American engineering.

It comes to life with precision manufacturing and meticulous quality control—either in our Tualatin, Oregon factory, located in one of the USA's greatest centers of knife manufacturing, or in our overseas manufacturing facilities. Manufacturing depth like this enables us to build products for every budget and to meet demand throughout the US and worldwide.

While a knife may look simple, it's actually a complex piece of machinery. And when it comes to production brands like Kershaw—building a million knives each year—the complexity only gets amplified. From CNC machines, precision grinders, lasers, and a factory-full of specialized equipment to hand-assembly and sharpening by hundreds of skilled workers, what it takes to get that knife into your hands is nothing short of amazing.

For knives proudly made in our Oregon USA factory, look for this badge.

All other knives are proudly designed and engineered in the USA, and manufactured in China.

## SPECIAL FEATURES

# AUTOMATIC

The Kershaw Launch series is a collection of sleek, fast, instant-open knives. A pushbutton lock holds the blade in place under pressure from a coil spring. Pushing the button releases the lock and the blade springs open, ready for use.

# EDC-SPEEDSAFE

Kershaw launched a revolution with SpeedSafe® assisted opening knives. When closed, a torsion bar in the handle creates a bias toward the closed position. To open the knife, apply manual pressure to the thumb stud or flipper to overcome the torsion bar's resistance and open the knife.

## NEW DIVIDEND - COMPOSITE

1812OLCB

a KERSHAW ORIGINALS design

<b>STEEL</b>	CPM D2, N690, bead-blasted finish

# EDC-MANUAL

Manual-opening knives can be opened with a thumb stud, flipper, or hollow in the blade. Some also feature our KVT ball-bearing opening that enables the blade to move out of the handle smoothly when you pull back on a flipper. KVT makes opening manual knives as easy as assisted.

## BLADE STYLES

### AMERICAN TANTO

Angles upward to meet the spine. The angled edge can be straight or curved. The American tanto offers a strong, durable tip while the straight edge makes it ideal for push cuts.

### CLEAVER

The cleaver blade shape is a high-utility style defined by a slightly curved belly and down-turned tip. The shape makes a good EDC or utility knife and is ideal for slicing and chopping tasks.

### CLIP POINT

The tip of the clip point is lower than its spine. The top part of the blade has been "clipped" off so that the blade goes straight from spine to tip. The clip point can also have a concave curve to the tip. Clip points are great for everyday carrying but are also favored for hunting knives.

### DROP POINT

The blade's point drops down below the blade's spine. Usually has good "belly," a curved cutting edge. It is one of today's most widespread blade shapes because it's a great all-purpose blade.

### HAWKBILL

A hawkbill blade is hook-like with a concave belly. It offers ease in cutting ropes, fabrics, and even trimming shrubbery.

### RECURVE

Instead of having a fully convex belly, a recurve blade will also have a gentle concave curve along part of the cutting edge. This gives the edge something of an "S" shape. The recurve blade provides good belly for slicing and a concave curve for easy draw or pull cuts.

### REVERSE TANTO

Instead of the edge angling up to meet the spine, a reverse tanto's tip angles down to meet the edge. Like the American tanto, the reverse tanto offers a strong tip for piercing and, generally, a straight edge, ideal for good slicing.

### SHEEPSFOOT

A sheepsfoot blade is similar to the Wharncliffe, but it has a steeper slope from spine to edge and a less-pointy tip. They are often favored by emergency responders due to the relative safety of the rounded tip. The straight edge works well for slicing push cuts and general-purpose cutting.

### SPEAR POINT

In a spear-point blade, the top and bottom of the blade are symmetrical, and the tip is in line with the center of the blade. It may have one or both edges sharpened. It offers tactical style as well as excellent piercing.

### TRAILING POINT

A trailing-point blade has a tip that ends above the spine of the knife. Many trailing point knives also have a deep belly curve for superior slicing, including skinning and hunting use.

### WHARNCLIFFE

A Wharncliffe blade has a completely straight cutting edge. The spine of the blade gradually slopes down to meet the edge, forming a tip. The straight edge makes a great blade for slicing push cuts, for wood carving, general cutting, and utility work.

## BLADE FINISHES & COATINGS

### BEAD-BLASTED FINISH

The knife blade is "blasted" or sprayed with a mixture of fine media, including glass and aluminum-oxide beads, under high speed and pressure. This smooths the blade surface and creates a soft, non-reflective, matte look. Depending on the media, this finish can produce a darker or a lighter blade color.

### BLACK-OXIDE COATING

A chemical bath converts the surface of the steel to magnetite; it enhances appearance and adds some corrosion resistance.

### BLACKWASH™ FINISH

Our BlackWash™ finish produces a vintage look like that of a well-used tool or favorite, broken-in pair of jeans. Kershaw products may have DLC BlackWash™ or black-oxide BlackWash™ finishes.

### CERAKOTE

Cerakote is a high-performing, durable polymer-ceramic composite coating that can be applied in a variety of colors. The coating enhances abrasion/wear resistance, corrosion resistance, chemical resistance, impact strength, and hardness.

### DLC COATING

Diamond-Like Carbon (DLC) coating displays properties similar to those of natural diamond, including hardness, wear resistance, and reduced friction.

### POWDERCOAT

The coating is applied as a fine powder and cured under heat. This creates a smooth, even, and tough coating.

### PVD COATING

PVD stands for Physical Vapor Deposition. Specialized materials are vaporized via a vacuum process. Then the vaporized material is deposited as a thin layer on selected objects. In our case, it enables us to finish our blades and/or handles with a thin coating that adds color and offers excellent wear and corrosion resistance.

### SATIN FINISH

A Kershaw satin finish will typically show a faint pattern of vertical lines across the blade. It is a shinier finish than bead blasting and somewhat lighter in color.

### STONEWASHED FINISH

Blades are tumbled with ceramic "stones," which gives the blade surface a desirable roughened or scuffed look. The look can be pronounced or subtle. The finish helps hide scratches and fingerprints.

### TITANIUM CARBO-NITRIDE

Kershaw also uses titanium carbo-nitride to produce an attractive black or gray blade coating that increases the blade's hardness, helps maintain the edge, and increases the lifetime of the blade.

### TWO-TONE FINISH

Sometimes Kershaw will combine two different blade finishes on a single blade, for example, satin finish on the blade flats and stonewash on the blade grinds.

# BLADE STEELS

## CPM 20CV

HRC: 59-61

This Crucible powdered metallurgy tool steel has a high volume of vanadium carbides for exceptional wear resistance and edge retention. The highest level of chromium of any high-vanadium steel gives it excellent corrosion resistance.

TOUGHNESS: ▲▲▲▲▲▲▲▲▲▲  
EDGE RETENTION: ▲▲▲▲▲▲▲▲▲▲  
CORROSION RESISTANCE: ▲▲▲▲▲▲▲▲▲▲  
SHARPENING EASE: ▲▲▲▲▲▲▲▲▲▲

## 8CR14MOV

HRC: 58-59

The formula for this steel has additional chromium for added stain resistance. It also benefits from Kershaw's expertise in precision heat treatment.

## 7CR17MOV

HRC: 57-59

Similar to 440A stainless steel, but with a formula that has added molybdenum and vanadium to improve hardness and wear resistance.

## 420HC

HRC: 58

This modified 420 steel has higher amounts of carbon and chromium to boost hardenability and corrosion resistance. It is an excellent everyday steel: tough, corrosion resistant, easy to sharpen, and takes a good edge.

TOUGHNESS: ▲▲▲▲▲▲▲▲▲▲  
EDGE RETENTION: ▲▲▲▲▲▲▲▲▲▲  
CORROSION RESISTANCE: ▲▲▲▲▲▲▲▲▲▲  
SHARPENING EASE: ▲▲▲▲▲▲▲▲▲▲

## CPM S30V

HRC: 59.5-61

Large carbides in this all-around premium knife steel make it take and hold an edge extremely well; it is also very tough and wear resistant.

TOUGHNESS: ▲▲▲▲▲▲▲▲▲▲  
EDGE RETENTION: ▲▲▲▲▲▲▲▲▲▲  
CORROSION RESISTANCE: ▲▲▲▲▲▲▲▲▲▲  
SHARPENING EASE: ▲▲▲▲▲▲▲▲▲▲

## CPM 154

HRC: 58-60

This powdered metallurgy steel has a more uniform distribution of carbides, so it takes and holds an excellent edge. Also offers good corrosion resistance, wear resistance, and toughness.

TOUGHNESS: ▲▲▲▲▲▲▲▲▲▲  
EDGE RETENTION: ▲▲▲▲▲▲▲▲▲▲  
CORROSION RESISTANCE: ▲▲▲▲▲▲▲▲▲▲  
SHARPENING EASE: ▲▲▲▲▲▲▲▲▲▲

## 420J

HRC: 56-58

Highly stain resistant, but ductile, this steel is excellent for use where "flex" is desirable, for example, in fillet knives.

TOUGHNESS: ▲▲▲▲▲▲▲▲▲▲  
EDGE RETENTION: ▲▲▲▲▲▲▲▲▲▲  
CORROSION RESISTANCE: ▲▲▲▲▲▲▲▲▲▲  
SHARPENING EASE: ▲▲▲▲▲▲▲▲▲▲

## D2

HRC: 59-60

This "semi-stainless" tool steel is known for excellent edge retention, wear resistance, and good toughness.

TOUGHNESS: ▲▲▲▲▲▲▲▲▲▲  
EDGE RETENTION: ▲▲▲▲▲▲▲▲▲▲  
CORROSION RESISTANCE: ▲▲▲▲▲▲▲▲▲▲  
SHARPENING EASE: ▲▲▲▲▲▲▲▲▲▲

## SANDVIK 14C28N

HRC: 58-60

This high-performance steel was developed in a partnership between Kershaw and Sandvik Steel. Offers excellent corrosion resistance.

TOUGHNESS: ▲▲▲▲▲▲▲▲▲▲  
EDGE RETENTION: ▲▲▲▲▲▲▲▲▲▲  
CORROSION RESISTANCE: ▲▲▲▲▲▲▲▲▲▲  
SHARPENING EASE: ▲▲▲▲▲▲▲▲▲▲

## 65MN

HRC: 56

A tough, durable carbon steel designed for hard-use tools such as Kershaw's Camp Series machetes.

## 3CR13

HRC: 54-56

A value-priced high-chromium stainless steel.

## 4CR14

HRC: 55-57

A value-priced steel; very highly stain resistant.

## 8CR13MOV

HRC: 57-59

Kershaw precision heat-treats 8Cr13MoV steel to bring out its very best high-performance characteristics: the ability to take and hold an edge, strength, and hardness.

EDGE RETENTION: ▲▲▲▲▲▲▲▲▲▲  
CORROSION RESISTANCE: ▲▲▲▲▲▲▲▲▲▲  
SHARPENING EASE: ▲▲▲▲▲▲▲▲▲▲

## OPENING SYSTEMS

### ASSISTED OPENING - SPEEDSAFE®

When closed, a torsion bar in the handle creates a bias toward the closed position. When opening, the torsion bar adds to the pressure from your finger, and pushes the blade open.

### AUTOMATIC

A push-button lock holds the blade in place, but under pressure from a torsion spring. When the button is pressed, the released pressure opens the blade. The Kershaw Launch series features a selection of these sleek, instant-open knives.

### MANUAL

No springs or torsion bars, these folders rely on washers for a simple, smooth pivot open. Washers are made of various materials: usually plastic or bronze.

### MANUAL KVT BALL-BEARINGS

Relies on a ring of "caged" ball bearings that surround the knife's pivot and enable the blade to move out of the handle smoothly. KVT makes opening manual knives as smooth, easy, and often as fast as assisted opening.

### SLIPJOINT

These folders usually have a detent system (a tension rod or ball and groove) that biases the blade toward open or closed. To open the blade, simply overcome the detent manually.

## OPENS WITH

### FLIPPER

The flipper is a metal extension found at the back of the blade near the pivot. It can be found on both assisted and manual folders.

### NAIL NICK

The nail nick is a groove in the top of the blade, usually halfway down the length of the blade. It is found on manual folders.

### PUSH BUTTON

The push button is found in the handle of the folder near the pivot. It is often used in automatic folders.

### THUMB STUD

The thumb stud is a small stud at the top of the blade near the pivot. It may be on one or both sides of the blade.

### THUMB DISK

The thumb disk is a small disk found at the top of the blade.

### EMERSON WAVE SHAPED FEATURE

This is a wave-shaped hook built into the back end of the blade, similar to the flipper.

## LOCKS

### FRAME LOCK

In a frame lock knife, the knife handle—its "frame"—consists of two plates of material on either side of the blade. When the knife is opened, one side of the frame butts up against the back end of the blade and prevents the blade from closing until released. The thickness of the frame material blocking the blade open makes the frame lock extremely sturdy.

### LINER LOCK

The most common of today's blade-locking systems. The handle consists of two metal plates (the "liner") on either side of the blade. When the knife is opened, one side of the liner butts up against the back end of the blade and prevents the blade from closing until released. A secure and convenient way to make using a Kershaw folding knife even safer.

### INSET LINER LOCK

The inset liner lock is a Kershaw variation on the liner lock. Kershaw insets a sturdy steel plate on the inside of the knife's handle. It is riveted into place in a custom-machined cutout on the interior of the handle. This enables us to make a knife with a slimmer profile that won't weigh your pocket down, while still providing the strength and security of a locking liner.

### MID-LOCK

The oldest of the popular blade-locking systems, yet the principle is the same as with the others. Once the knife is opened, a steel bar locks into place behind the blade and prevents the knife from closing until released by the knife user.

### PUSH-BUTTON LOCK

Like Kershaw's other locking systems, once the blade is open, a mechanism blocks the butt end of the blade and prevents it from closing accidentally. In this case, a spring-loaded lock is built into one side of the handle, and it must be depressed in order to unlock the blade.

### SLIPJOINT

A slipjoint knife has no lock. Usually there is a detent system to ensure safe use. Using a tension rod or ball and groove, the blade is biased toward the open or closed position. To close the blade, simply overcome the detent manually.

### SUB-FRAME LOCK

The patented Kershaw Sub-Frame Lock is a variation on the traditional frame lock. In this case, a piece of a lighter weight frame, like G10, is machined out, and a piece of steel is screwed into its place. This steel acts like a standard frame lock. It enables us to make a knife with a slimmer profile, while still providing the strength and security of a frame lock. (The Kershaw Sub-Frame Lock is covered under US Patent 9,120,234.)

### TIP-LOCK

The Tip-Lock can be found on all Leek, Scallion, and Chive SpeedSafe® knives. It's a simple slider that, when engaged, ensures the blade will not accidentally open. It's especially helpful in cases where the knife might be juggled in a briefcase, backpack, or purse.

# HANDLE MATERIALS

## ANODIZED ALUMINUM

Anodizing makes aluminum stronger and enables Kershaw to add scratch and fade resistant color to knife handles.

## CARBON FIBER

Carbon fiber atoms are bonded together in crystals aligned in long strands, then woven together like fibers. Combined with resin to make the fibers rigid, carbon fiber makes a knife handle material that is extremely strong and extremely lightweight.

## COPPER

Denser and heavier than iron, this natural metal starts out reddish-orange in color, but over time will gain a patina, like a copper penny. The patina is a result of oxidation, and the colors it turns will change with time as well. Copper makes an interesting knife handle material due to the changing patina. Depending on how you handle and use it, the knife will look different throughout its life.

## CO-POLYMER PLASTIC

A co-polymer is a compound of two or more different molecules, chosen for specific characteristics. The co-polymers Kershaw uses for knife handles generally have a slightly rubbery texture to improve grip security.

## G10

An epoxy-filled woven glass fiber; it is extremely stable, unaffected by temperature changes, and makes excellent handles and handle scales for knives.

## GLASS-FILLED NYLON

Nylon synthetic polymer is reinforced with glass threads for increased strength, stiffness, and dimensional stability, combined with excellent wear resistance.

## K-TEXTURE™ GRIP

An exclusive texture and pattern used on the handles of certain Kershaw knives. K-Texture™ enhances a secure grip.

## STAINLESS STEEL

An alloy of iron and carbon, most steel also has additional elements alloyed in it to enhance specific characteristics. As a handle material, stainless steel is strong and attractive.

## TRAC-TEC INSERTS

A rough-surfaced rubber insert that provides additional friction for a non-slip grip.

# POCKETCLIPS

## SINGLE-POSITION

The pocketclip is mounted in a single, fixed position on the knife handle.

## REVERSIBLE

Right-handed, tip-up or tip-down  
OR  
Right- or left-handed, tip-up

## 3-POSITION

Right-handed, tip-up or tip-down  
AND  
Left-handed, tip-up

## 4-POSITION

Right-handed, tip-up or tip-down  
AND  
Left-handed, tip-up or tip-down

## DEEP-CARRY

This specially designed pocketclip is positioned at the very end of the handle so that the knife can be carried deeper inside the pocket.

Kai USA, Ltd., founded as Kershaw Knives in 1974, began with one mission: to design and manufacture tools that knife users would be proud to own, carry, and use. Today, premium materials, state-of-the-art manufacturing, extremely tight tolerances, and meticulous craftsmanship ensure that each Kershaw knife or tool provides a lifetime of performance and pride of ownership. The Kershaw brand is especially known for innovative technologies and materials, resulting in numerous industry awards. We manufacture many of our products in our 55,000 sq. ft. facility located south of Portland Oregon, in the city of Tualatin. Our campus houses a state-of-the-art manufacturing facility, our design, engineering, and manufacturing teams, as well as the customer service experts who sell and support our Kershaw brand knives and tools. Kershaw products are backed with a Limited Lifetime Warranty.

### AUTHORIZED DEALERS

Want to be sure the Kershaw you're carrying is the real thing? Buy from our Authorized Dealers. Specially selected by Kershaw for their ability to professionally represent and sell our products, Authorized Dealers carry genuine Kershaw quality products and service. You can be sure your purchase is fully covered under our Limited Lifetime Warranty. Find an Authorized Dealer in your area at our website: [kershawknives.com](http://kershawknives.com)

### LIMITED LIFETIME WARRANTY

Kershaw knives from Kai USA Ltd. carry a limited warranty for the lifetime of the original owner, except when stated otherwise. We guarantee our knives against manufacturing defects in material and construction and to perform as advertised when properly used and maintained. The Limited

Lifetime Warranty is non-transferable and does not extend to normal signs of wear, rust, damage, or breakage due to improper use, improper maintenance, accidents, loss, or theft. This warranty is void on products that have been modified in any way. Any product we determine to be defective will be repaired or replaced solely at our discretion. To receive warranty repair or replacement, the owner must send the product to be evaluated by Kai USA Warranty Services in our Tualatin, Oregon headquarters. In addition to the provisions of this warranty, the owner may also have other rights that can vary by state. The Limited Lifetime Warranty does not apply to the TX Tool, Fire Starter, or Kershaw Knife Oil. No other warranties are implied or expressed other than what is specifically stated here. Kai USA Ltd. reserves the right to determine what constitutes normal wear, improper use/maintenance, and modification.

We reserve the right to make changes to this warranty at our discretion and without notice.

For warranty information, shipping tips, and the Warranty/Repair Form required for warranty service, please visit our website: [kershawknives.com](http://kershawknives.com)

### BLADE REPLACEMENT

If you accidentally break your Kershaw folder's blade, we can replace it for just \$10. Blades that break due to a manufacturing defect will still be replaced under warranty, free of charge. For a replacement blade, knives must be shipping to Kai USA. Please see our website for shipping and warranty service information.

### REPLACEMENT PARTS

Some replacement parts can be shipped to you. Please see our website for an updated list of what we will ship for free.

### VOUCHERS

There may be cases when a Kershaw knife has been evaluated and is eligible for warranty service, but may not be able to be repaired or replaced. This can be true with discontinued models for which we may no longer have parts or stock. In such cases, at our discretion, we will issue a voucher for the original Manufacturer's Suggested

Retail Price. The voucher value can then be applied to the purchase of a current-model Kershaw—directly from us. If you also wish to have your original knife returned, please call our warranty team toll-free: 1-800-325-2891. We will retain the knife for 30 days from the date the voucher is issued. If it is not reclaimed by then, the knife will be recycled.

### LIABILITY DISCLAIMER

Kershaw knives are intended and sold for legitimate everyday carry and/or sporting purposes only. The purchase, use, and ownership of knives are subject to a wide variety of federal, state, and local laws and regulations. Always comply with all laws and regulations in effect in your area. Due to the complexity and constantly changing nature of these laws and regulations, it is the responsibility of the buyer to investigate and comply with the laws and regulations that apply in his or her specific area. You, and not Kai USA Ltd., are solely responsible for any claims resulting from violation of these laws and/or regulations.

### WARNING!

Knives are extremely sharp tools and should only be used or handled with the utmost care and caution. Any use other than cutting (such as prying or twisting) is considered misuse and abuse—and will void your warranty. Kershaw/Kai USA Ltd. is not responsible for any injuries resulting from misuse or abuse of the product.

Do not use any Kershaw knife as a throwing knife (other than the Ion 1747BW or Aethon 1748 throwing knives) or a stabbing device. Throwing knives and knives developed for stabbing have a distinctly different design and function. Kershaw knives are not intended for throwing or stabbing; they are designed for cutting purposes only.

We reserve the right to change shipping terms, specifications, materials, or discontinue products at any time, without notice.

Kershaw Products are covered by one or more pending and issued U.S. patents: 4,715,121; 4,741,106; 5,802,722; 5,815,927; 6,006,385; 6,397,476; 6,388,431; 6,412,130; 6,145,202; 6,223,372; 6,338,431; 6,378,214; 6,397,476; 6,427,334; 6,591,504; 7,086,158; 7,370,421; 7,395,599; 9,120,234; D303,748; D316,802; D317,390; D321,818; D329,185; D348,818; D351,328; D365,725; D366,605; D375,243; D392,131; D410,833; D437,197; D438,085; D450,228; D454,043; D454,768; D455,062; D467,783; D474,669; D479,104; D479,114; D484,770; D488,045; D565,918; D566,222; D569,212; D570,180; D572,542; D572,562; D575,614; D576,466.
